ICI OTN/DWDM Backbone Systems – Huawei, Cisco, and ICI Own-Brand Product Lines

Optical Transmission — Huawei OptiXtrans

Building ultra-broadband, simplified, and intelligent enterprise transport networks.

Cisco Network Convergence System (NCS) 2000 Series

Enjoy a touchless, programmable optical network

Get touchless programmability, massive scale, and performance for future-ready networks. The NCS 2000 Series is ideal for dense wavelength-division multiplexing (DWDM) solutions.

- Huawei OSN 9800/9600/1800 OTN systems; Cisco NCS 2000 OTN and NCS 4000 PTN systems.
- ICI own-brand products are ideal comprehensive solutions for low-budget backbone and metro systems.
- ICI delivers end-to-end solutions - high level design, low level design, sourcing, implementation, maintenance, and upgrade.
- Two decades' real-world-experience based international logistic and engineering capability.
- Cross-region multi-vendor environment – unlock from incumbency vendors with Transparent Pass-Through technology.
- Mainstream NMS' that support AI/Telemetry/DRL-based fast-response of fault detection and processing.
- 200G/400G/800G ultra-long-haul systems with coherent transceivers, FlexO and OTUCn.

ICI – Network Expertise Helps You Succeed
